

Experience Southern Idaho

Jump, Climb, Ski, Cave, Raft and Explore – Adventure Awaits

Shoshone Falls, the Niagara of the West, plunges 212 feet. The falls are best viewed in the early spring as water volumes are dependent on snowpack. Year round, however, there is much to enjoy and explore around Shoshone Falls as there are numerous trails and scenic vistas.

Escape the ordinary, head to Twin Falls and stroll over the 1500 foot-long Perrine Bridge. BASE jumpers leap from the bridge and soar 500 feet down to the floor of the beautiful Snake River Canyon. This bridge is only place in the world where one can enjoy this thrilling sport year-round without a permit.

Spend the day golfing near Centennial Park, swim at Dierkes Lake, shop in small shops and well-known national stores or ride or bike along one of the many trails in the area. Dine at one of the fine restaurants in the area; dinner with a view never tasted so good.

Southern Idaho Tourism has a FREE Mobile app to help visitors explore everything the region has to offer.

Download the App today at visitsouthidaho.com/mobile.

South central Idaho is at a crossroads of many different ecosystems. Basins, wetlands, peaks and rivers, each with their own unique ecosystem, draw many birders and outdoor enthusiasts to the region. City of Rocks National Reserve and Castle Rocks State Park offer scenic walks near the historic California Trail and opportunities for wildlife watching, photography, world class technical rock climbing, picnicking, snowshoeing, cross-country skiing and camping. You are officially invited to come and enjoy the wonders of the rocks.

Idaho has more white river miles than any other state in the lower forty-eight. Ride down the Hagerman stretch of the Snake River, soak at Miracle Hot Spring, spend a morning meandering along the scenic Thousand Springs Byway, pet a sturgeon at the Hagerman National Fish Hatchery and picnic beneath a seamless blue sky!

Dubbed the strangest 75 square miles in North America, by an early visitor, Craters of the Moon is a playground for hiking, caving, backpacking and exploring.

With pathways winding around 25 volcanic cones and 60 different distinct lava flows, the area is geologically significant and a whole lot of fun. While on the surface, it may appear as a desolate, black terrain; it is home to many birds, plants and animals. In addition, it is a destination place for visitors from all over the globe.
